**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-5 is the inclusion of the limitation of a second line including a first end connected to a printed circuit board to ground current supplied to the first line and a second end having an opened structure. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Pruzick (U.S. Patent No. 4,135,184) teaches a plurality of overlapping loops connected in phase have conductors extending along and crossways of the passageway in staggered arrangement to provide system sensitivity for different paths of degrees and different planes of orientation of resonant circuits to be detected. However, Pruzick does not disclose or suggest a second line including a first end connected to a printed circuit board to ground current supplied to the first line and a second end having an opened structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
